

## BACIO /KISS

BACIO is the confirmation of a feeling. It has a real, tangible flavour to be experienced. All the sensations are alive and felt in the fullness of the moment. Green predominates and does so because it is the decisive chemical compromise between yellow and blue. The second figure at the back amalgamates with the dark background, but reappears in the strong handshake in the foreground. The setting is romantic with an imaginary moon and entwined legs. A big hand caresses the face.

### THE WINE

The concept of generosity and completeness in a wine are the traits that represent total sensory harmony - the possibility of finding multiple sensations of all of its components in equal measure in a glass. The deep and purplish colour is a prelude to perceiving a potent fruity and floral aroma. The persistent taste has body and velvety tannins. The Montepulciano grape has always been known for its generosity of colour, warmth and extract. The technique of delestage, with air during fermentation ennobles the wine in every aspect.
